**EC levels** are for guidance. Water EC varies so dosages will change, and plant needs change depending on species, strain, climate etc. Start where we recommend, but don't be afraid to gently vary dosages to adapt to your plant's needs.

**EC** is measured after pH adjustment (pH 5.5. to 6.5), addition of nutrients and supplements.

**Cleaning:** regular use of FloraKleen prevents salt build ups in both substrate and systems.

**Ripening:** in the period before harvest use GHE Ripen for bigger yields and flavour.

**GHE**
